

Transport Packaging Systems

Fabri-Form's Solution Tote Systems Are Designed To Save You Time and Money

This Solution Tote is shown complete with totes, covers and pallet for one complete, protective shipping unit that can be reused over and over. Color striping allows for accurate inventory control.

Solution Totes shown empty and nested together

Solution Totes Advantage

- Custom designed to your requirements
- Light weight and high impact resistant
- Stackable and nestable
- Produced of durable HDPE
- Approved FDA material
- Custom color striping for inventory control
- Usually pays for itself in less than one year
- Reduces or eliminates packaging disposal costs
- Recyclable at end of useful life
- Impervious to acids, caustics, oil, and ultraviolet
- Can be design with pallet and cover shipping systems

The Fabri-Form Company created Solution Totes to be an inexpensive alternative to wood, foam and corrugate transport packaging. Our Tote systems & made of high-molecular weight high density polyethylene (HDPE) that is clean, durable and recyclable.

We custom design and produce our Solution Totes. They weigh less than 10 pounds, but are designed to safely transport the most delicate items. Solution Tote Packs are stackable and when empty they nest together, reducing the room required for storage and shipping. They can also be designed to conform to existing pallet and cover configurations.

For over 50 years, The Fabri-Form Company has designed and produced custom thermoformed transport packaging systems for a wide range of applications. Call us today and we'll show you how our custom thermoformed transport packaging can save you time and money.
